**Consent to Neuromodulator Treatment**

Neuromodulator a neurotoxin produced by the bacterium Clostridium A. Neuromodulators can relax the muscles on areas of the face and neck which cause wrinkles associated with facial expressions. Treatment with Neuromodulators can cause your facial expression lines or wrinkles to essentially disappear. Areas most frequently treated are: glabellar area of frown lines, located between the eyes; crow's feet (lateral of the eyes); and forehead wrinkles. Neuromodulators are diluted to a very controlled solution and when injected into the muscles with a very thin needle it is almost painless. Clients may feel a slight burning sensation while the solution is being injected. The procedure takes about 15-20 minutes and the results last approximately 12 weeks. With repeated treatments, the results may last longer.

**RISKS AND COMPLICATIONS:** It has been explained to me that there are certain inherent and potential risks and side effects in any invasive procedure and in this specific instance such risks include but are not limited to: Post treatment discomfort, swelling, redness, and bruising. Double vision. Rarely weakened tear ducts. Post treatment bacterial and/or fungal infections requiring further treatment. Allergic reaction. Minor temporary droop of eyelid(s) in approximately 2% of injections (this usually lasts 2-3 weeks). Occasional numbness of the forehead lasting up to 2-3 weeks. Transient headache. Flu like symptoms.

**PHOTOGRAPHS:** I authorize the taking of clinical photographs and their use for scientific purposes both in publications and presentations. I understand my identity will be protected.

**PREGNANCY, ALLERGIES, NEUROLOGIC:** I am not aware that I am pregnant and I am not trying to get pregnant. I am not nursing. I do not have significant Neurologic disease including but not limited to Myasthenia Gravis, Multiple Sclerosis, Lambert-Eaton Syndrome, Amyotrophic Lateral Sclerosis (ALS), Parkinson's or that I have any allergies to the toxin ingredients, or human albumin.

**PAYMENT:** I understand that this is an "elective" cosmetic procedure and that payment is my responsibility

**RESULTS:** I am aware that when small amounts of purified botulinum (Neuromodulators) are injected into a muscle it causes weakness or paralysis of that muscle. This appears in 7-10 days and usually lasts about 12 weeks, but may be shorter or longer. In a very small number of individuals the injection does not work as satisfactorily or for as long as usual and there are some individuals who do not respond at all. I understand that I will not be able to "frown" while the injection is effective but that will reverse after a period of months at which time retreatment is appropriate. I understand the post Neuromodulator instructions provided to me.

*I understand this is an elective procedure and I hereby voluntarily consent to treatment with Neuromodulator injections for the condition known as: Facial Dynamic Wrinkles. The procedure has been fully explained to me. I have read the above and understand it. My questions have been answered satisfactorily. I accept the risks and complications of the procedure and I understand that no guarantees are implied as to the outcomes of the procedure. I also certify that if there are any changes in my medical history, I will notify the office immediately.*
